Virar, Mumbai

Summary

AI Engineer specializing in LLM-powered products: RAG pipelines, LangGraph multi-agent systems, agentic browser extensions, and AI automation backends. Shipped 5 production AI products used by real users. Won 7 hackathons including IIT Roorkee (National) and Bit & Build (International, 2,500+ participants). Teaches AI development to 49K+ YouTube and 16K+ Instagram followers. Core stack: LangChain, LangGraph, FastAPI, Docker, OpenAI API, Gemini API, Claude API, FAISS, n8n, Next.js.

Education

- **Shree L. R. Tiwari College of Engineering, Mumbai University** Mumbai, India
B.E. Computer Engineering | CGPA: 8.5 Sep 2023 — Jun 2026
- **Viva College of Diploma Engineering and Technology** Mumbai, India
Diploma in Computer Engineering | 84% Aug 2020 — Jun 2023

Experience

- **Surfboard Ventures** Virar, Mumbai
Associate Software Engineer Intern (Next.js, TypeScript, NestJS, Razorpay) Feb 2025 — Present
 - **Streaming UI:** Shipped features for a live SaaS product; built React components that render AI-generated content streams with real-time streaming state management.
 - **Payment Integration:** Integrated Razorpay for in-app certification purchases: checkout flow, webhook handlers, and idempotent error recovery; zero payment failures post-launch.
 - **API Contract Design:** Defined REST API contracts and JSON schemas with the NestJS backend team before build; eliminated integration bugs by catching shape mismatches at design time.
- **Nano Technology (Freelance)** Remote
AI Automation Engineer (LangChain, LangGraph, FastAPI, Docker, FAISS, n8n, OpenAI) Jun 2024 — Feb 2025
 - **LangGraph Agents:** Built multi-step ReAct agents with LangGraph for stateful orchestration, tool use, BufferMemory, and PDF retrieval over a FAISS vector store; automated 3+ hours/day of manual analyst work.
 - **FastAPI Services:** Built FastAPI microservices wrapping the LangChain retrieval pipeline for client integrations; containerized with Docker for consistent local and deployment environments.
 - **n8n Automation:** Designed n8n as the full workflow backend: HTTP request nodes, webhook triggers, custom JS function nodes, and conditional routing; eliminated manual steps for 4 recurring workflows.
 - **Prompt Engineering & Evals:** Authored and iterated system prompts for document QA and data extraction; validated against 50-question eval sets before each client deployment.
 - **Observability:** Tracked token usage, latency, and error rates per run with Langfuse; identified a prompt consuming 3× expected tokens and cut cost by rewriting context injection.
- **Edba Academy (Contract)** Remote
Frontend Engineer (HTML, Tailwind CSS, JavaScript, SEO) Jul 2023 — Sep 2023
 - **Academy Portals:** Built 3 responsive academy portals; on-page SEO improvements increased Google Search Console impressions measurably within 60 days.
 - **Performance:** Optimized asset loading and reduced render-blocking resources; Lighthouse scores above 85 across all portals.
 - **Certification Infrastructure:** Integrated dynamic certificate generation for course completions, eliminating all manual PDF exports for the operations team.

AI Projects

- **Sauna Orbit**
[📺 Demo](#) [🐙 GitHub](#)
AI Browser Agent · JavaScript · Manifest V3 · Gemini API · Claude API · Chrome Side Panel
 - MV3-native Chrome extension with a background service worker, side panel, and content scripts. Supports **Gemini and Claude** via bring-your-own-key (`chrome.storage.local`; zero backend). Serializes live DOM into the LLM prompt, executes browser-action tools (fill-form, click, scrape, navigate tabs), and loops until the task completes with streaming replies and tab-strip progress.
- **ContentPulse**
[🌐 Live](#) [📺 Demo](#) [🐙 GitHub](#) [📦 npm](#)
AI Chatbot Platform + npm SDK · NestJS · Next.js · LangChain · Groq · Contentstack · Turborepo · Docker · AWS
 - Turborepo monorepo (Next.js + NestJS) with a **chatbot SDK published to npm**. Integrates Contentstack CMS via OAuth 2.0; users authenticate, select their stack, and get LLM responses grounded in their own content (Groq/OpenAI, streaming, session memory). Dockerized services deployed to AWS. n8n pipeline handles webhook-triggered research, SEO scoring, and multi-platform publishing. Monitoring caught a 40% cost spike; fixed by summarizing retrieved chunks pre-injection.

- **Arise**

 [Live](#)  [GitHub](#)

AI Learning Platform · LangChain Agents · Gemini API · ElevenLabs TTS · Next.js · OpenAI Embeddings

- LangChain router dispatches each query to a specialized chain: quiz generation, adaptive study roadmap, or ElevenLabs TTS narration. ConversationBufferMemory persists session context. Output scoring validates relevance; off-topic answers trigger a retry with a revised prompt.

- **CuraLink**

 [Live](#)  [GitHub](#)

Medical RAG System · LangChain RAG · FastAPI · Docker · FAISS · OpenAI Embeddings · MongoDB · Next.js

- Medical QA over clinical documents using LangChain RetrievalQA with FAISS and OpenAI embeddings, served through a Dockerized FastAPI backend. Each answer includes source citations. Supports English, Hindi, and Marathi. Chunk size and overlap tuned to keep retrieval precision above 80% on a 100-question test set.

Skills

AI / LLM LangChain, LangGraph, ReAct agents, RAG, tool use, memory, OpenAI API, Gemini API, Claude API, Groq, FAISS, Pinecone, embeddings, function calling, prompt engineering

Evals & Observability Langfuse, LangSmith, custom eval sets, output scoring, token and latency logging, retry logic, cost optimization, hallucination checks

Frontend React, Next.js, TypeScript, Tailwind CSS, ShadCN UI, Chrome extensions (Manifest V3), streaming UI

Backend & Data Node.js, NestJS, FastAPI, Python, MongoDB, PostgreSQL, REST APIs, webhooks, n8n, vector databases

Infra & Deployment Docker, AWS (EC2, S3), GCP, GitHub Actions, Vercel

Tools GitHub, Postman, Figma, Notion, Contentstack, AWS Cloud Foundations

Achievements

Hackathons

Winner — IIT Roorkee 44-Hour Hackathon (*National*). AI product judged best by IIT faculty and industry engineers

Winner — TechSurf 2025 by Contentstack. 40,000+ participants across 5 editions

1st Runner-Up — Webathon 2025 (*National, ACM MHSSCE*). Multi-round competition with startup mentorship track

2nd Runner-Up — Saboo Siddik College Hackathon (*National*)

5th Place — Google Build & Blog Hackathon, Google Mumbai BKC. Theme: Generative AI on Google Cloud

Top 5 Finalist — Bit & Build International Hackathon. 2,500+ participants from 20+ countries

Top Performer — Global Digital Health Summit Hackathon (*International*). AI and telemedicine track

Extracurricular

- **Blogging & SEO:** Manage and rank personal websites on various niches, improved SEO and generated 2M+ Google organic traffic in 6 months:

- [HireBace.com](#)

- [hemantkadam.in](#)

- **Content Creation:** Manage multiple platforms with a combined audience of 49K+ subscribers and 16K+ Instagram followers:

- [Hemant Kadam YouTube \(33K subscribers\)](#)

- [Blogger Hemant YouTube \(10K subscribers\)](#)

- [Tech Hemant YouTube \(6K subscribers\)](#)

- [Instagram Reels @hemantkadam.ai \(16k followers\)](#)

- **n8n Community:** Official n8n Ambassador (India); hosted 3 official n8n offline meetups:

- n8n Open House @ Paytm Office

- n8n Co-working Meetup @ Hive8

- Builder Don't Wait — judged AI projects

- **Workshops & Mentoring:** Conducted technical workshops at SLRTCE including:

- *How to Do Freelancing*

- *AI Agent Automation*

Certifications

- **AWS Academy Graduate – Cloud Foundations:** [AWS Academy](#)

- **Contentstack for Developers + Launch:** [Contentstack](#)

- **Postman API Fundamentals Student Expert:** [Postman](#)

- **Web Front-End Development:** [Edba Academy](#)
